

Product information

FoxDuster flexible dust remover

Characteristics

- very flexible;
- also reaches difficult to access spaces;
- can be used at great heights in combination with a telescopic handle.

The FoxDuster flexible dust remover enables you to remove dust fast and effectively from places that are difficult to reach. For instance, it removes dust from between radiator panels, between horizontal lamellae or between cupboards and walls. In all these places, the FoxDuster flexible dust remover quickly removes all dust.

The FoxDuster can easily bend up to 180 degrees. After use, it springs back to its original position. Use the FoxDuster as it is, or attach it to a flexible telescopic handle for an even more flexible deployment. The FoxDuster is available in the sizes small and medium. The accompanying microfibre covers are available separately.
