Complete solution for dealing with body spillages

Oxivir Body Spillage Kit

- Complete kit for dealing with body spillages
- Contains the powerful disinfectant – Oxivir Plus
- Safe for use on both hard and soft surfaces
- Quickly, safely and effectively helps clean spills

Complete kit for dealing with body spillages

The Oxivir Body Spillage Kit is the complete solution for dealing with body spillages. All the equipment that is needed to deal with body spillages safely and effectively is included. The kit includes: disposable nitrile gloves, disposable face mask, disposable plastic scoop/scrapper, disposable bio-hazard bag, 750 ml spray bottle of Oxivir Plus, 40 g absorbant granules, disposable paper towels, disposable apron, tie wraps and foot gloves.

The kit is made up of two componets; a yellow disposable storage bag which is designed to be mounted in high risk areas with two spillage kits inside and a refill pack for replenishment. The kit is completely disposable, so once taken from the box, there is no risk of containation as all is disposed of in the bio-hazard bag.

Contains the powerful disinfectant – Oxivir Plus

Oxivir Plus is a highly concentrated oxygen based disinfectant with excellent bactericidal, virucidal and fungicidal activity. The unique formulation is based on innovative Accelerated Hydrogen Peroxide technology that effectively destroys pathogens such as MRSA, Hepatitis C and Norovirus. Oxivir Plus is ideal for dealing with contaminated body spillages which can help control pathogen outbreaks.

Safe for use on both hard and soft surfaces

Oxivir Plus is Woolsafe approved and based on a blend of ingredients that are suitable for most acid resistant washable surfaces and fabrics. The oxidising kill-action of the product is non-staining.

Oxivir Body Spillage Kit

Fast and effective, yet safe for users

Oxivir is safe for users and occupants as it:

- Contains no VOC's (Volatile Organic Compounds)
- No perfumes
- Non staining
- Safe on fabrics

Reduced environmental load

Compared to commonly used hard surface disinfectants Oxivir Plus will have a reduced environmental impact as:

- Hydrogen peroxide biodegrades to water and oxygen.
- Hydrogen peroxide leaves no active residues that may contribute to the development of tolerant strains.

Disinfectant accreditation

Oxivir was tested at HYGCEN and MikroLab GmbH the accredited test institutes in Hamburg and Bremen, according to the most recent European Standards (ENNorms) and proven to be an outstanding disinfectant with bactericidal, virucidal, fungicidal properties. The actives in Oxivir are supported by the European Biocidal Product Directive (Directive 98/8/EC).

Product	Pack size	Cases per layer	Cases per pallet	Selling bar code	Article code
Body Spillage Kit (with storage bag)	1 x 750ml Oxivir Plus and 2 kits	78	234	7615400167883	100840608
Body Spillage Kit (Refill kit)	4 x 2 refills = 8 spillage applications	12	60	7615400168507	100842411
