

Product information

DustBow flexible dust remover

Characteristics

- Very flexible;
- Can be used in small spaces;
- Can be used to reach heights with a telescopic handle.

Due to the flexibility of the Greenspeed[®] DustBow, dust can be effectively removed from difficult to access places, for example between panels of radiators, between furniture and walls, from the top of high cupboards, light fixtures or ceiling-mounted ventilation grills.

The DustBow can be bent 180 degrees. The DustBow may be used manually or attached to a two- or three-part telescopic handle. No dusty space is safe from the DustBow flexible dust remover.

Specifications

Colour	grey
Dimensions	61 x 7 cm
Composition	RVS, foam and synthetic material
Weight	± 190 grams
